

In May of this year, an external review report was undertaken by Brisbane Catholic Education on CTK.

This external review involves an independent review panel reviewing the operation of our school and soliciting direct feedback from staff, students and parents on a number of aspects including:-

- Engagement with the school community;
- Educational and social outcomes, and;
- The school's strategic direction.

We are pleased to advise that the independent review panel "experienced a sense of vitality, collaboration and "ownership" of this school community and genuine willingness on the part of school leadership to listen and to be inclusive of a range of viewpoints."

The external review report particularly highlighted the opportunities provided by the school for parents to become engaged with the strategy and goal development of CTK. The report was also complimentary of the personal approach taken by staff to students and the professionalism of our teachers in utilizing the various learning data that is available to enhance literacy and numeracy.

Students that were engaged by the panel indicated that they are challenged positively by teachers and provided with opportunities to work at "the next level" of learning.

The report commended the CTK community in their approach to shaping, evaluating and reporting on the eight priorities of the BCE Strategic Renewal Framework.

The Board would like to congratulate Trudy, the staff, students and the wider CTK community on this fantastic report. We can truly be proud of our school as a provider of broad and effective education outcomes for our children.

A full copy of the report is available to parents from the office.
